SUREN NETWORK CERTIFIED NETWORK ASSOCIATE

PHYSICAL CONNECTION TEST

1. Types of mediums ?

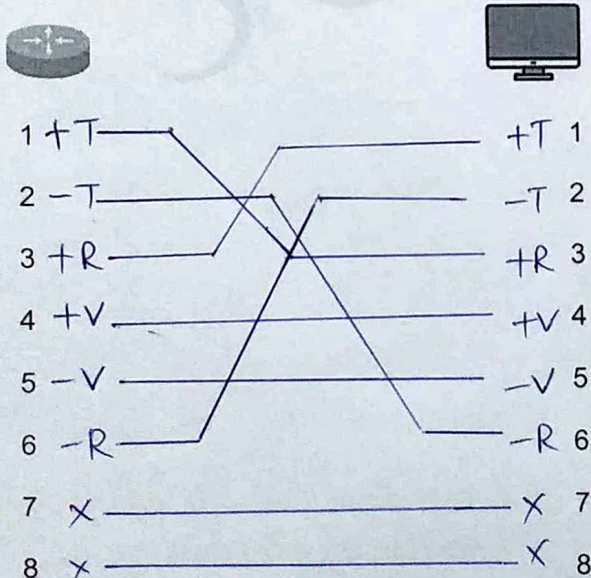

There are three types of medium

- i) Radio frequency - (Guest network) - wireless eg. wifi
- ii) Electrical signal - Copper cable wired UTP (unshielded twisted pair cable)
- iii) Light signal - FOC (fiber optic cable)

2. Write down switch 8-pins ?

- 1 +R
- 2 -R
- 3 +T
- 4 +V
- 5 -V
- 6 -T
- 7 X
- 8 X

3. Connect utp cable between two devices

4, Explain AUTO MDIX ?

AUTO MDIX stands for Automatic Medium Dependant Interface crossover. It is a hardware technology which is automatically connect assign the pin value with equalant pin.

5, Explain POE injector ?

POE stands for power over Ethernet. If a camera is connected with switch the switch must ~~had~~ a POE switch or else we need supporting device called POE injector. It is help to provide voltage supply to camera.

6, Explain POE switch ?

POE - Power over Ethernet. If we need to connect camera with switch, that the switch must be POE switch. It is used to provide voltage supply to camera.

7, Explain types of nic & function ?

NIC stands for Network Interface Card.

- It is a hardware technology with inbuild IP and MAC address for network.

- It is used to convert binary signal to electrical and electrical signal to binary.

- Similarly it is also used in converting binary signal to wireless signal (Radio frequency) and radio frequency to binary.

Types of nic :

1. Wired - UTP, Fiber optics, etc...
2. Wireless - Wifi (radio frequency)
